

AYUSH PAL

Kanpur Nagar, Uttar Pradesh, India | +91 6393649521 | ayushpal1849@gmail.com | LinkedIn: <https://www.linkedin.com/in/ayush-pal-ap223> | GitHub URL: <https://github.com/ayushpal1849>

SUMMARY

Python Developer with hands-on experience in **data extraction, transformation, and backend systems**. Skilled in **Python, SQL, REST APIs**, and building data pipelines for structured and semi-structured data. Strong understanding of **ETL** concepts, data validation, and scalable backend solutions.

CORE TECHNICAL SKILLS

- ❖ **Languages:** Python, SQL.
- ❖ **Data:** ETL/ELT concepts, Data Cleaning, Data Validation.
- ❖ **Backend Development:** FastAPI, Flask, REST APIs, JSON, CSV Handling.
- ❖ **Databases:** PostgreSQL, MySQL.
- ❖ **Tools:** Git, GitHub, Docker, Linux.
- ❖ **Cloud:** AWS (Basic- S3, EC2 fundamental).
- ❖ **Frontend Familiarity:** ReactJS, HTML5, CSS3.

PROFESSIONAL EXPERIENCE

PALMDIGITALZ (LET US SUPPORT PVT. LTD.)

CHENNAI

Python Developer

August 2024 – Present

- Developed Python scripts to extract data from APIs and transform JSON/CSV data into structured formats.
- Built backend logic for processing large datasets with validation and error handling.
- Wrote optimized SQL queries using joins, aggregations, and filtering for analytics use cases.
- Implemented logging and exception handling to monitor data pipeline failures.

EDUCATION

Bachelor Of Technology (B. Tech) In Computer Science & Engineering

Apollo Institute of Technology

Kanpur, U. P. / India

CGPA- 7.62

July 2023

- **Relevant Coursework:** Python, Web Development, Data Analytics, Software Engineering.

PERSONAL PROJECTS

Resume Parser (Data Engineering angle)

- Designed a Python-based pipeline to extract raw resume data and convert it into structured formats.
- Performed data cleaning, normalization, and validation before storing results in a database.
- Worked with unstructured text data and converted it into analytics-ready structured fields.
- Integrated REST APIs and handled different file formats (PDF/DOCX).

Automated OCR & Data Extraction Pipeline | *Python, YOLOv8, Tesseract, FastAPI*

- Developed a Proof of Concept (PoC) to extract text and structured data from images using YOLOv8 for detection and Tesseract for OCR.
- Built a FastAPI backend to process image uploads and return extracted text in JSON format for frontend usage.
- Implemented image preprocessing techniques using OpenCV (thresholding, noise removal) to improve the readability of low-quality documents.

Business Prediction API | *FastAPI, Scikit-learn, Docker*

- Built a backend service serving a Machine Learning classification model to predict business outcomes based on input parameters.
- Containerized the application using Docker to ensure consistent deployment environments.
- Utilized Pandas for data cleaning and Matplotlib for exploratory data analysis during the model training phase.

TRAINING & CERTIFICATIONS

- **Web Development Trainee: Intern Shala (Dec 2022 - Mar 2023)** – Built responsive websites using HTML, CSS, JS, and PHP.
- **Python Programming: IIT Kanpur (Aug 2021).**
- **Data Analytics Consulting Virtual Internship: KPMG (Aug 2023).**
- **Software Engineering Virtual Experience: JPMorgan Chase & Co. (June 2020).**

ADDITIONAL DETAILS

- **LANGUAGES:** English (Fluent), Hindi (Native)
- **SOFT SKILLS:** Problem Solving, Backend Debugging, Team Collaboration.
- **INTERESTS:** Technology Research, System Design, Backend Optimization.
